

Peach State Health Plan Synagis Administration Policy 2009-2010

Peach State Health Plan strongly encourages Synagis administration in the physician's office. Requests for home administration will only be approved if:

1. Child is homebound and unable to travel
2. Child is immune compromised and may be endangered by contact with other children in the physician's office.

If an alternate venue for Synagis administration is necessary, because the physician will not stock the drug, the physician's office may contact our Pharmacy Department for assistance at 1-800-514-0083.
