

Breast Cancer Screening (BCS-E)

Why It Matters

According to the American Cancer Society, breast cancer is the most common cancer in women in the United States with the exception of skin cancers.¹

Accounting for **approximately 1 in 3 of all new cancer diagnoses in females each year**, breast cancer is the second leading cause of cancer deaths in women.^{ibid} Because most people impacted by breast cancer do not exhibit symptoms, screenings are recommended at age 40.^{ibid}

Measure Description

The percentage of women aged 40 to 74 as of Dec. 31 of the measurement year that had a mammogram to screen for breast cancer in the past two years.

*The age group for Medicare Stars remains at 50–74 for 2026 in the interim.

Key Tips

- ✓ Obtain mammography report with date and result every two years or yearly when indicated.
- ✓ Follow-up on outstanding orders when no result has been obtained.
- ✓ Document mammogram screening at annual visits with patient reported month and year.
- ✓ Document mastectomy status or other exclusions annually, including month and year (use of Z codes are a best practice).
- ✓ Educate patients about the importance of early detection and encourage testing at annual preventive visits.

(continued)

Peach State Health Plan, Wellcare and Ambetter are affiliated products serving Medicaid, Medicare and Health Insurance Marketplace members, in the State of Georgia respectively. The information presented here is representative of our network of products. If you have any questions, please contact Provider Relations.

What Do You Need to Do?

- ✓ Order a mammography report, including the date and result, every two years, or more frequently when necessary.
- ✓ Document the mammogram screening at a patient's annual visit.
- ✓ Ensure documentation of a completed mammogram by denoting the month and year, and follow-up on outstanding orders when no result has been obtained.
- ✓ Remind patients to complete a Release of Information (ROI) at their radiology appointment to enable the primary care provider to receive the mammogram test results.
- ✓ Work with the IT department to confirm appropriate code mapping in documentation when submitting supplemental data files.
- ✓ Educate patients on the importance of a mammogram for cancer screening.
- ✓ Assist patients in scheduling mammograms at checkout and identify any barriers that may prevent members from completing the test.

The suggested codes for these services include:

Description	Code
Mammogram	CPT: 77061–77063, 77065–77067
