

Medicare Tier 6: Select Care Drugs

MAPD | 2026

What is Tier 6 in Medicare Part D?

Tier 6, also known as the Select Care Drugs tier, is designed to provide affordable access to certain medications. It includes preventive vaccines* and many commonly prescribed generic drugs used to manage chronic conditions like high blood pressure, high cholesterol, and diabetes.

How much do Tier 6 medications cost?

Medications in Tier 6 usually cost nothing, with no deductible or copay for up to a 100-day supply. This applies across all coverage phases and at any preferred pharmacy. Although higher tiers usually mean higher out-of-pocket costs, Tier 6 is an exception. It's specifically designed to reduce costs for essential medications, making them more accessible to members.

Medications covered on Wellcare's Select Care Drug Tier 6 at \$0:

High Blood Pressure

- Benazepril ± HCTZ
- Benazepril and Amlodipine
- Candesartan ± HCTZ
