RE: New CKD/ESKD healthy living support program for your Wellcare patients

Dear [Provider name and credentials],

Wellcare is now offering a support program to eligible members with CKD/ESKD that is designed to help improve their quality measures and clinical outcomes, resulting in more healthy days for these members.

This program provides eligible Wellcare members, with or at risk of CKD/ESKD, with a personal support team of health professionals to help them manage their kidney disease and actively follow their treatment plans. We have partnered with a leading value-based kidney care organization, Somatus, for delivery of this program. The goal is to keep patients out of the hospital, improve their quality of life, and help slow or stop disease progression.

The Somatus Healthy Living Program is an included benefit for these members and is available to them at no extra cost. To find out which patients in your practice are eligible for this program, please email info@somatus.com.

The Somatus team supports your patients through:

- One-on-one care to help manage their kidney disease and address social determinants of health
- Personal health coaching that is based on their condition, treatment options, and diet
- Assistance to transition safely from hospital to home
- Guidance exploring transplant options, if appropriate
- Access to nurses via the 24/7 Somatus Care Line at **(855) 851-8354**, ext. **9**

Questions? Contact Somatus directly at:
(855) 851-2252 (TTY: 711) | info@somatus.com
Mondays - Fridays, 8:00 a.m. to 11:00 p.m. (ET)

We appreciate your support encouraging those of your patients who have or are at risk of CKD/ESKD, and who are members of Wellcare, to engage in this healthy living program. Working together, we can improve the quality of life and health of our shared patients.
