SCOPE:

Centene Corporate Pharmacy Solutions, Centene Corporate Pharmacy and Therapeutics Committee, Health Plan Pharmacy Departments, Health Plan Pharmacy and Therapeutics Committees, and Envolve Pharmacy Solutions.

PURPOSE:

To define the process of Centene Health Plan Drug Utilization Review (DUR).

POLICY:

The standard prospective and retrospective DUR programs are delegated to the designated pharmacy benefit manager (PBM), Envolve Pharmacy Solutions, utilizing the standards, criteria, protocols and procedures established by the mutual agreement of the Centene Corporate Pharmacy and Therapeutics Committee, Health Plan Pharmacy Departments, and Envolve Pharmacy Solutions, and in accordance with applicable state and federal requirements and NCQA standards. The DUR program is submitted for review and approval to the Centene Corporate and Health Plan Pharmacy and Therapeutics Committees annually. The DUR program is designed to alert prescribers and/or dispensing pharmacists by identifying overuse, underuse, inappropriate or medically unnecessary care, and to address safety concerns associated with specific drugs, including the potential for drug interactions. The DUR program also functions to identify opportunities to improve the quality of care for patients including adherence to prescribed therapy and improvements in the medication regimen consistent with the patient's diagnoses or conditions. The results of any retrospective DUR programs may also be used to initiate additional claims review and analysis at the health plans. In addition, follow-up studies may be performed to assess the impact and outcomes of retrospective DUR interventions.

PROCEDURE:

<u>Selection of DUR Projects</u>: DUR projects are initiated from review of current clinical literature and monthly trends in utilization that may prompt the need for further analysis and the potential need for an intervention. The DUR projects are carefully chosen to maintain a high level quality of care for members by intervening with prescribers and dispensing pharmacists to reduce potential inappropriate prescribing or promote improved drug therapy based on recognized standards of care. Data generated from prescriber responses is used to modify and improve the DUR projects as well as report outcome data to determine the effectiveness of the projects.

PROCESS:

Plan pharmacists are notified by Envolve Pharmacy Solutions, either monthly or quarterly (dependent on the clinical intent of the DUR initiative), of members identified as meeting the requirements for a potential DUR intervention. If deemed appropriate, communications are

PRODUCT TYPE: Medicaid	PAGE: Page 2 of 5

initiated to providers by phone, fax or via intervention letters. Faxes and intervention letters may include patient prescription profiles for prescribers to review along with outcome checklists to monitor practitioner response. In most cases a brief but definitive provider communication is sent notifying prescribers of potential concerns or suggestions for improved therapy, while offering providers further detail upon request. Interventions are documented in the care management application.

<u>Prospective DUR Guidelines:</u> Prospective DUR functions are provided at the point-of-sale (POS) and include real-time messaging that can affect dispensing. The Envolve Pharmacy Solutions claims processing system uses a compiled database provided by a nationally recognized drug compendia (Medispan or First Data Bank) to generate electronic alerts to dispensing pharmacies via standard POS messaging when potential drug conflicts exist. In most cases, Envolve Pharmacy Solutions uses a passive notification that is meant to augment the dispensing pharmacy's internal DUR dispensing application and to avoid interruption or delays in drug therapy.

PASSIVE DUR POS MESSAGING		
Drug-Related Problem	Related Concurrent DUR Alert	
Medication Overuse		
Medication Underuse		
-	Poor adherence/Failure to receive medication Underuse precaution	
1 &	- Low dose alert	
	- Insufficient duration alert	
Adverse Drug Events (ADE)		
Drug interaction -	Drug-food interactionDrug-alcohol interaction	

In some cases (such as the pregnancy contraindications below), system edits may require the dispensing pharmacist to override the edit confirming that the issue of concern has been addressed. The prospective DUR system edits use predetermined standards which are based upon the peer-reviewed medical literature and references such as DrugDex, Clinical Pharmacology and American Hospital Formulary Service Drug Information.

DUR REJECTIONS		
Drug-Related Problem	Related Concurrent DUR Alert	
Medication Overuse		
Overdose/toxicity	 Overuse precaution

- Therapeutic duplication
Improper drug selection - Drug-age precaution
- Drug-pregnancy alert
- Drug-gender alert

Adverse Drug Events (ADE)

Drug interaction – Drug-drug interaction (significant)

<u>Pregnancy/Drugs Contraindicated in Pregnancy:</u> Envolve Pharmacy Solutions has an automated drug warning alert to pharmacies when patients are prescribed drugs labeled as pregnancy categories D or X. The following warning message will return to the pharmacy:

Caution: Teratogenic risk Consult female members between 11-50 yrs related to pregnancy risk

Retrospective DUR Guidelines: All standard retrospective DUR programs adhere to current standards of drug based screening elements for medications that have limited clinical documentation supporting combination use, carry high risk warnings for concomitant drug therapy, identify overuse, identify underuse or sub-therapeutic dosing of medication, suggest possible fraud and abuse potential or offer other opportunities to improve patient care.

Goals: Standard retrospective drug utilization review goals include:

- Improve prescribing practices by educating prescribers on current practice standards and guidelines and by making recommendations to improve medication therapy.
- Alert prescribers to potential problems, such as drug interactions, drug non-adherence, overutilization, multiple prescribers, and therapeutic duplication with the dual objectives to provide a high quality drug benefit and impact overall drug utilization.
- Educate and communicate to prescribers on the safety, efficacy and pharmacoeconomics of drugs placed on the Preferred Drug List (PDL).
- Identify areas of abuse, misuse or fraud by prescribers or members.
- Improve adherence with essential medications to treat chronic diseases such as diabetes, hypertension, hyperlipidemia, heart failure and asthma.

<u>Patient Specific Review</u>: The plan pharmacist performs an ongoing evaluation of prescription claims to review claims history for potential therapeutic issues using plan specific pharmacy claims data provided by Envolve Pharmacy Solutions. The plan pharmacist reviews the monthly claims data to look for patient or drug specific claims information that may indicate inappropriate pharmacy benefit utilization or patient safety concerns. The plan pharmacist may refer members to case management nurses for member intervention.

REVISION LOG

REVISION	DATE
Removed "completed in accordance with Centene Health Plan's Utilization	06/07
Management/Quality Management Work Plan" and inserted "delegated to the	
pharmacy benefit manager (PBM) utilizing the standards, criteria, protocols and	
procedures established by Centene, and in accordance with applicable State and	
federal requirements and NCQA standards. The DUR program has been	
established and administered in accordance with Centene Health Plan's	
Utilization Management/Quality Management Work Plan" in the "Policy"	
section.	0.5/0.
Inserted "in conjunction with the PBM" in the "Pregnancy/Drugs	06/07
Contraindicated in Pregnancy" section.	
Removed "The plan pharmacist, in conjunction with" in the "Drug-Drug/Disease	06/07
State Interactions" section.	
Deleted "Outliers will receive a person visit from the clinical pharmacist and/or	06/07
plan medical director" from the "Patient Specific Review" section.	
Made the following changes in the "Excessive Cost Prescription Claims"	06/07
section: change \$500 to \$1,500, added "finding are forwarded to the PBM for	
pharmacy outreach", deleted "generate summary reports and", and deleted	
"Drugs that are routinely billed incorrectly are monitored on a quarterly basis.	
All claims for the product under review are scanned. Claims billed with	
incorrect quantities are reviewed and reversed".	0.7.10.7
Inserted the following sentence to the "Policy" section, "Each DUR project topic	07/07
is selected and approved by the Health Plan prior to delegation to the PBM for	
completion."	0 = 10 =
Inserted "chosen by the Health Plan" in the "Selection of DUR Projects" section.	07/07
The DUR program is delegated to US Script while working with Corporate	08/08
Pharmacy and the Health Plans. US Script has completely revamped their DUR	
process. They are rolling out new DUR projects for each quarter of 2008. The	
new US Script DUR Program required substantial rewording of CC.PHAR.04 to

align with the new process. Moving forward the DUR P&P will be updated at	
the end of each calendar year to reflect the upcoming DUR programs.	
Complete reworking of the document to integrate the policies and procedures in	02/09
place at the Health Plans with those at US Script.	
Included the current US Script Retrospective 2009 DUR Schedule in the	02/09
PROCESS section.	
Revisions completed at this time were made to address clerical errors, align with	02/10
NCQA standards and language, and represent the work processes in place at	
both the Plan level and at US Script.	
Teratogenic edit clarified. Other clerical changes made.	02/11
No changes.	02/12
Removed the term "CCMS" and replaced with the more general term "care	02/13
management application".	
Made changes to the table regarding which DUR situations would trigger a	02/14
passive DUR alert versus which would cause a reject causing a call to USS.	
No changes necessary at this time.	08/14
Updated to remove the term Corporate Pharmacy Solutions from policy.	08/15
Annual Review	08/16
Changed US Script to Envolve Pharmacy Solutions	11/16
Removed United States Pharmacopoeia Drug Information and Facts and	02/18
Comparisons as references and added DrugDex	
Changed PBM system (legacy US Script) to claims processing system. EPS now	02/19
uses RxClaim and RxAdvance. Changed Medispan to "nationally recognized	
drug compendia (Medispan or First Data Bank)". RxClaim uses Medispan and	
RxAdvance uses FDB. Updated the Pregnancy section to reflect the current	
process and remove the old PBM system process. Added product type to header.	
Annual Review. No changes deemed necessary.	02/20
Annual Review. No changes deemed necessary.	02/8/21

POLICY AND PROCEDURE APPROVAL

The electronic approval retained in RSA Archer, the Company's P&P management software, is considered equivalent to a signature.
