26347-5: MG Breast – left diagnostic	
26348-3: MG Breast – right diagnostic	

To improve HEDIS measure:

- Ensure an order or referral is generated for mammogram during an Annual Preventive Visit and/or Annual Well Woman Exam for members 40-74 years old.
- Consider implementing a standing order and/or automated referrals for members eligible for mammography.
- It's important to submit the appropriate ICD-10 diagnosis code for a member's **history of bilateral mastectomy, Z90.13**.
- Proper documentation of mammography and exclusion in the patient's medical record:
 - » Provide results and findings of mammogram performed.
 - » Document screening in the "medical history" section of the record and update the section annually/biannually.
