

POLICY AND PROCEDURE

DEPARTMENT: PHARMACY	REFERENCE NUMBER: GA.PHAR.04
EFFECTIVE DATE: 4/2021	POLICY NAME: CLINICAL PHARMACY SERVICES INTER-RATER RELIABILITY
REVIEWED/REVISED DATE: 04/2021	RETIRED DATE: N/A
PRODUCT TYPE: MEDICAID, AMBETTER	PAGE: 1 of 4

SCOPE:

Peach State Health Plan (PSHP) Pharmacy Department.

PURPOSE:

The purpose of this policy is to assess the clinical pharmacists' knowledge of prior authorization (PA) criteria application and clinical decision making. This is to ensure consistent decision-making for non-formulary/preferred and formulary/preferred drugs with restrictions. This process provides a peer review approach to improving clinical decisions and assessing clinical knowledge.

POLICY:

An inter-rater reliability (IRR) assessment evaluates the consistency and validity of the rater with the accepted standards used for quality assurance.

Inter-rater reliability testing is conducted in order to:

- Meet National Committee for Quality Assurance (NCQA) standards.
- Minimize variation in the application of clinical guidelines.
- Evaluate and identify potentially avoidable utilization.
- Target process improvement opportunities.
- Avoid litigation due to incorrectly applied guidelines.

Inter-rater reliability testing is conducted at least annually on all clinical pharmacists in order to determine the reliability of decision/recommendation-making as it refers to the prior authorization review. By pinpointing areas of differing opinion among pharmacists, a cohesive decision-making process can be created and implemented.

PROCEDURE:

1. On an at least annual basis, a file for audit and review for consistency and clinical reasonable judgement, and will be completed by PSHP's Vice President of Clinical Pharmacy Services and/or their designee using accepted standards to complete the review. PSHP will follow the NCQA methodology using the '8/30 rule'. This rule is described below.

"Confidential and Proprietary: Exempt from disclosure as Trade Secrets under Georgia's Open Records Act.
O.C.G.A. 50-18-72(b)(1)"

2. PSHP Clinical Pharmacy Services Vice President and/or their designee will select a total of eight prior authorization requests for testing. Clinical pharmacists will receive identical cases for testing. If clinical pharmacists fail to achieve a consensus determination on 90% of the initial 8 cases, then 22 new cases must be presented for resampling. This process follows the '8/30' rule.
3. The clinical team will review each case in each of the following categories:
 - Timeliness of pharmacy decisions/determinations. (UM-5C)
 - Decision is clinically sound
 - Appropriate/consistency of use of clinical criteria (UM-2C)
 - Appropriate medical necessity pharmacy denials (UM-4E)
 - Relevant clinical information provided for pharmacy decision (UM-6C)
 - Intent of meaning in provider letters
 - Easily understood language/Criteria Reference on member denials (UM-7G)

Each reviewer will submit their decisions to the Vice President of Clinical Pharmacy Solutions and/or designee for evaluation.

4. If the audit completed by the Vice President of Clinical Pharmacy Solutions and/or designee demonstrates any inconsistency (IRR assessment does not generate 90% agreement between the reviewer and raters), it will be presented by the Clinical Pharmacy Services Director and/or designee at a Clinical Staff Meeting with all Clinical Pharmacists present.
5. To ensure consistent decisions, an action plan will be developed to include (but not limited to) guideline development, training measures, and process improvement as necessary. Minutes will be documented and submitted to NCQA.
