

## Vaccines are **not just for kids**

### **Babies and children get lots of immunizations.**

These are shots that carry vaccines. Vaccines help prevent diseases. They help protect children from measles, mumps, chickenpox, tetanus and more.

Adults also need immunizations. That's because some vaccines you got as a child may not protect you as an adult. Some vaccines are needed only when you plan to

travel overseas. Other vaccines need to be given every year. This includes the flu vaccine. A new flu vaccine is made every year.

Do you know if you are up to date on your immunizations? Talk to your doctor to find out. Call Peach State Health Plan at **1-800-704-1484** if you need help finding a doctor.

## Start Smart

Our Start Smart for Your Baby® program helps you focus on your health during your pregnancy. Visit [PSHP.com](http://PSHP.com) to learn more.

# Studying **new treatments, tests**

**Your health is important to us.** Peach State Health Plan watches for the latest in medical care. This may be new medicine, tests or surgeries. We want to make sure new treatments are safe and effective. Peach State Health Plan has a team of doctors that reviews new medical care. The team checks information from other doctors and scientific groups. The new medical care is then shared with our doctors. This allows Peach State Health Plan doctors to give you the most fitting and current types of care.

## Your time matters

Peach State Health Plan wants to make sure you get the care you need, when you need it. We work with providers to set standards for wait times.

- For routine care, you will be seen within 14 days.
- For urgent care, you will be seen within 24 hours.
- For specialty care, you will be seen within 30 days.
- From the waiting room, you should be taken to the exam room within 60 minutes of your scheduled visit time.

Are you unable to get an appointment within those time frames? Call us at **1-800-704-1484**. We can help.

## We are here to help

Peach State Health Plan is here to help you with many of your healthcare needs. Just call us at **1-800-704-1484**.

We can help you:

- Find a provider
- Get a new member ID card
- Get transportation to medical appointments
- Get paper copies of anything on our website

Do you need a copy of your member handbook? Would you like to update your personal information? You can do that by calling us. You can also find that and lots of other information on our website, [PSHP.com](http://PSHP.com).

## When antibiotics won't help

Antibiotics are drugs used to treat infections caused by bacteria. They do not help infections caused by viruses. That means antibiotics won't help:

- Colds
- Flu
- Coughs

Sicknesses treated by antibiotics include:

- Strep throat
- Urinary tract infections (UTIs)
- Some ear infections

Do not take antibiotics meant for someone else. Talk to your doctor if you are sick. He or she can tell you what to do to feel better.

## Preventive care for women

**Health screenings are tests that check for certain diseases.** They help find problems early. They can also prevent future health problems. Some screenings are recommended just for women. If you are a woman, you should have:

- A cervical cancer screening. This can be done with a Pap test or an HPV test. Pap tests can be done every three years. An HPV test can be done every five years.
- A breast cancer screening. Mammograms are X-rays that look for cancer. Depending on your age and health history, you may need one every year or every two years.
- A chlamydia test. This test checks for a disease spread during sex. Women who are sexually active should have this test every year.

Talk to your doctor about what tests you need. You may need some tests every year. Do you need help finding a doctor? We can help. Call **1-800-704-1484**.

---

## To floss or not to floss?

What does it mean to take good care of your teeth? According to the American Dental Association, brushing twice a day is not enough. You also need to floss at least once a day.

Flossing helps to clean between your teeth. These are areas that are hard to reach with a toothbrush. Flossing can remove debris and plaque. This will reduce your risk of gum disease and tooth decay. You should also have regular visits with a dentist.

## We care about **quality**

**We want to improve the health of all our members.**

One way we do that is by improving the care we offer. Our Quality Improvement program sets goals for quality and helps us check up on how we are doing. We also review the quality and safety of our services

and care. We ask our members if they are satisfied with their care.

Learn more and see how we're doing at **PSHP.com**. You can also ask for a paper copy of a report. Call **1-800-704-1484**.

Do you need help understanding this? If you do, call Peach State's Member Services line at 1-800-704-1484. If you are hearing impaired, call TDD/TTY 1-800-659-7487. You can also get this information in large font or an alternative language, or have this information read to you over the phone by calling Member Services.

Para solicitar este documento en español o para escuchar la traducción, llame al Servicio al Cliente al 1-800-704-1484 (TDD/TTY: 1-800-255-0056).
