

Provider Bulletin

Provider Information and Data Updates

This is a friendly reminder that Peach State Health Plan follows the Georgia Department of Community Health's policy around accurate provider information and data. According to DCH guidelines, it is the responsibility of all providers (**including delegated**) to maintain their information and data accuracy. This information should be maintained through the GAMMIS website.

Claims received by Peach State Health Plan require the provider NPI number. All NPI & Medicaid numbers received must be reported to GAMMIS. Claims submitted by providers with non-credentialed NPI numbers will be denied. Those providers that are not currently credentialed with GAMMIS can become credentialed by visiting <http://mmis.georgia.gov>.

If you have any questions about the above-mentioned information, please refer to the **Ordering, Prescribing or Referring Requirement Claim Submission Guide** ([OPR-Claim-Submission-Guide.pdf](#)), or you can reach out to our Customer Service team at **1-866-874-0633**.
