[Revision Log](#)

See [Important Reminder](#) at the end of this policy for important regulatory and legal information.

---

### Description

Ocular ultrasonography involves the transmission of high-frequency sound waves through the eye and the measurement of their reflection from ocular structures. The B-scan converts the echoes into patterns of dots that form a two-dimensional, cross-sectional image of the ocular structure. This policy describes the medical necessity requirements for an ophthalmic B-scan.

### Policy/Criteria

- I. It is the policy of health plans affiliated with Centene Corporation® (Centene) that an ophthalmic B-scan is **medically necessary** for the following indications:
  - A. Endophthamitis
  - B. Orbital tumor and extraocular muscle evaluation
  - C. Intraocular tumor evaluation and differentiation
  - D. Retinal detachment, choroidal detachment, membrane differentiation
  - E. Retinal structure evaluation in patients with a miotic pupil
  - F. Opaque media, e.g., corneal scars, mature cataract, vitreous hemorrhage
  - G. Ocular trauma
  - H. Intraocular/orbital foreign body

### Background

Ophthalmic ultrasound provides quick and noninvasive evaluation of the eye and the orbit. Ophthalmic ultrasound has evolved from its introduction into the clinical setting to the current A- and B-scan contact and immersion techniques which are widely used for the characterization of intraocular and orbital pathology. The ability of ultrasound to quantitate intraocular structures includes the measurement of intraocular tumors, especially choroidal melanomas. This capability is very important in the current clinical paradigm of following smaller lesions over time, planning radiation treatment, and monitoring response to treatment. Echography is essential in the evaluation of the internal globe in cases of media opacity. Pathological conditions such as retinal detachment and intraocular tumors are most accurately and cost-effectively diagnosed by ultrasound. B-scan is less useful than the A-scan in ocular biometry with the exception of macular staphylomas in highly myopic eyes. In these cases an immersion 10-MHz B-scan displays the cornea and the staphyloma in the same image. A vector A-scan is then superimposed on the B-scan and aligned with the center of the staphyloma to allow an accurate axial length measurement. B-scans are typically indicated annually or less to monitor benign disease states.

### Coding Implications

This clinical policy references Current Procedural Terminology (CPT®). CPT® is a registered trademark of the American Medical Association. All CPT codes and descriptions are copyrighted 2018, American Medical Association. All rights reserved. CPT codes and CPT descriptions are from the current manuals and those included herein are not intended to be all-inclusive and are included for informational purposes only. Codes referenced in this clinical policy are for

informational purposes only. Inclusion or exclusion of any codes does not guarantee coverage. Providers should reference the most up-to-date sources of professional coding guidance prior to the submission of claims for reimbursement of covered services.

CPT® Codes	Description
76510	Ophthalmic ultrasound, diagnostic; B-scan and quantitative A-scan performed at the same patient encounter
76512	Ophthalmic ultrasound, diagnostic; B-scan *with or without superimposed non-quantitative A-scan
76513	Ultrasound, immersion (water bath) B-scan or high resolution biomicroscopy

**ICD-10-CM Diagnosis Codes that Support Coverage Criteria**

+ Indicates a code requiring an additional character

**Important Reminder**

This clinical policy has been developed by appropriately experienced and licensed health care professionals based on a review and consideration of currently available generally accepted standards of medical practice; peer-reviewed medical literature; government agency/program approval status; evidence-based guidelines and positions of leading national health professional organizations; views of physicians practicing in relevant clinical areas affected by this clinical policy; and other available clinical information. The Health Plan makes no representations and accepts no liability with respect to the content of any external information used or relied upon in developing this clinical policy. This clinical policy is consistent with standards of medical practice current at the time that this clinical policy was approved. “Health Plan” means a health plan that has adopted this clinical policy and that is operated or administered, in whole or in part, by Centene Management Company, LLC, or any of such health plan’s affiliates, as applicable.

The purpose of this clinical policy is to provide a guide to medical necessity, which is a component of the guidelines used to assist in making coverage decisions and administering benefits. It does not constitute a contract or guarantee regarding payment or results. Coverage decisions and the administration of benefits are subject to all terms, conditions, exclusions and limitations of the coverage documents (e.g., evidence of coverage, certificate of coverage, policy, contract of insurance, etc.), as well as to state and federal requirements and applicable Health Plan-level administrative policies and procedures.

This clinical policy is effective as of the date determined by the Health Plan. The date of posting may not be the effective date of this clinical policy. This clinical policy may be subject to applicable legal and regulatory requirements relating to provider notification. If there is a discrepancy between the effective date of this clinical policy and any applicable legal or regulatory requirement, the requirements of law and regulation shall govern. The Health Plan retains the right to change, amend or withdraw this clinical policy, and additional clinical policies may be developed and adopted as needed, at any time.

This clinical policy does not constitute medical advice, medical treatment or medical care. It is not intended to dictate to providers how to practice medicine. Providers are expected to exercise

## CLINICAL POLICY

### Ophthalmic B-Scan

professional medical judgment in providing the most appropriate care, and are solely responsible for the medical advice and treatment of members. This clinical policy is not intended to recommend treatment for members. Members should consult with their treating physician in connection with diagnosis and treatment decisions.

Providers referred to in this clinical policy are independent contractors who exercise independent judgment and over whom the Health Plan has no control or right of control. Providers are not agents or employees of the Health Plan.

This clinical policy is the property of the Health Plan. Unauthorized copying, use, and distribution of this clinical policy or any information contained herein are strictly prohibited. Providers, members and their representatives are bound to the terms and conditions expressed herein through the terms of their contracts. Where no such contract exists, providers, members and their representatives agree to be bound by such terms and conditions by providing services to members and/or submitting claims for payment for such services.

**Note: For Medicaid members**, when state Medicaid coverage provisions conflict with the coverage provisions in this clinical policy, state Medicaid coverage provisions take precedence. Please refer to the state Medicaid manual for any coverage provisions pertaining to this clinical policy.

**Note: For Medicare members**, to ensure consistency with the Medicare National Coverage Determinations (NCD) and Local Coverage Determinations (LCD), all applicable NCDs, LCDs, and Medicare Coverage Articles should be reviewed prior to applying the criteria set forth in this clinical policy. Refer to the CMS website at <http://www.cms.gov> for additional information.
